Remind Prospective Ole Miss Summer Students of Registration

UNIVERSITY, Miss. - A reminder today to prospective Ole Miss Summer session students from Registrar Robert B. Ellis: May 19 is the deadline for applications for admission to the 1962 summer session. This applies to all schools on the Oxford campus of the University - undergraduate, law and graduate.

"The deadline affects only those not previously admitted to ing it to be a wonderful success. the University in the program they seek to enter," he said. Former students may apply for readmission at any time through the first day of registration."

All undergraduates planning to enter law or graduate school, including those now enrolled at the University, must file application preciated. for admission, Mr. Ellis added. Registration for both terms of the 1962 summer session will be held on Friday, June 8. Fees and room rent for the second term will not be due until July 10, it was noted.

Second-term registration will be held on Friday, July 13, for those students who enter for the second term only. First-term classes will begin on

Saturday, June 9. Final exams will be on July 11-12. Secondterm classes begin on July 14. St. Louis Youth Center.

Secure in LOYE

Kathy is secure in her mother's love. Trust and peace gleam in her eyes. Happiness and hope shine in her face.

But Kathy has her heartaches. She falls and skins her knee. Or she loses her favorite dolly. And then her eyes are flooded with tears.

Mommy is always there to help. The knee is bandaged and kissed. The dolly is found. As Mommy's arm slips around Kathy, the tears are dried.

IT IS CLEARLY TO YOUR **ADVANTAGE** TO GET

It is much more than a matter of time-saving to bank where you can get FULL service. True, it is great convenience to have your savings and checking accounts "under one roof"... the same place where you can get a loan for anything from a home to a car to personal or business needs. But FULL bank service goes much further to help you, does much more for you!

A FULL-service bank, like ours, stands behind you, plans with you works with you, is ready at all times to vouch for you. A banking connection here is a definite advantage to you when you need money, references or financial advice. It is a friendly relationship that stands you in good stead always!

MONEY-SAVERS

Answers to 8 questions on car care that Shell dealers often hear

Shell dealers answer thousands of questions every year. Here are 8 that crop up all the time. The answers have helped many motorists save money. They may do the same for you.

What's that funny noise I hear? All cars make some noise. But be particubuly alent for any squeaks, equeaks, clicks, or rattles that crop up suddenly. Could be

anything from a sticking valve lifter to a loose wheel lug. Ask your Shell dealer to help you track down any unusual noise. You may save yourself a big repair bill

• How can I get more mileage from my tires? Rotate all tires, including the spare, every 6,000 miles. Drive at moderate speeds. Tires can wear twice as fast at 70 miles per hour as at 45. Avoid fast cornering, "jackrabbit" starts, sudden stops. Try not to bang tires against curbs. And check your tire pressure frequently.

need a lube job every thousand miles? Yes - unless you have one of the newer models that doesn't require it. But with any ear, remember that frequent lubrication offers your serviceman a chance to spot trouble before it costs you a lot of money. That's why Shell dealers give you a bumper to bumper inspection with every Shellubrication.

Can knock herr my engine? Usu-4 ally it's more annoying than harmful. But persistent knocking hampers perform-

ance and can lead to engine damage. That's why Shell scientists are such sticklers about knock. They even listen for it with stethoscopes and insist that Super Shell contain no fewer than three knock-fighting ingredients.

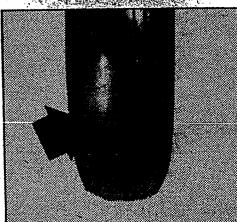

5 How can I make my battery last longer? Here are four suggestions: 1. Let your Shell dealer check your car's electrical system. Worn wires and loose connections can drain power. 2. Always maintain battery water to the proper level. 3. Avoid prolonged idling with radio turned on. 4. Go driving! Long drives help charge your battery.

What does TCP do? Shell's unique 6 TCP is a combustion control additive: The hot piston device above shows one way TCP works. The glowing deposit on the left has not been neutralized with TCP. In your engine, glowing deposits can ignite fuel too soon, wasting fuel and power. Deposit on right has been "fireproofed" by TCP. No glow - no power loss.

How often should I change off? The American Petroleum Institute recommends an oil change every 30 days in wines, every 60 days during summer.

Note: New Shell X 1000 Premium is the first premium motor oil that leaves no additive ash deposits. It fights four other internal troubles that can shorten engine life.

Why do my tires wear out on just one side? Most likely cause: wheels out of alignment. Result: your tires drag against the road and wear unevenly. Unbalanced wheels can also cause uneven wear and make your car shake or shimmy. That's why it's a good idea to keep tires balanced and have wheel alignment checked twice a year.

Now a question for you

Is your car giving you top performance? If there's any doubt in your mind, try a tankful of today's Super Shell, It contains 9 ingredients including a gum preventive, three knock-fighters, "cat-cracked" gasoline, a mileage booster, an anti-icer, quickstarting Butane, and Pentane mix for fast •Trademark for Shell's unique gasoline additive. Gasoline containing TCP is covered by U.S. Patent 2889212.
